

# MERIVOBX

## Let's Create

[www.blum.com](http://www.blum.com)

 **blum**<sup>®</sup>

Launching a new box system is hard work and requires extensive research and development. But that is not all. We have had to rethink all our processes, expand our plants, make space for new and specially developed production facilities, manufacture the right tools and coordinate everything down to the last detail, including packaging and logistics. However, it also requires a huge effort from our customers and partners. It means changing manufacturing processes, adapting assembly and even training employees.

We are aware of all this. But we are convinced that MERIVOBX is worth the effort. Our latest box system provides a unique combination of a slim drawer side design, high stability and easy assembly. It allows you to create a broad range of drawers with just a few components – and all with the same easy assembly process. The L-shape of the cabinet profile is coupled with maximum functionality, which is what makes the uniform box platform so innovative. Assembly is always the same, adjustment is simple and MERIVOBX boasts award winning design.

**MERIVOBX.**

Offering variety has never been so easy.

# Innovation Drivers

MERIVOBX brings together four innovations: a platform for simplified manufacturing, a minimalist design for a unique look, a new cabinet profile for enhanced functionality and a well-thought-out assembly concept for easy implementation.

## Platform

At the heart of MERIVOBX is the cabinet profile with the same installation for all applications. No matter which option you choose, the front and front fixing brackets are always the same, making it a true platform that reduces complexity and increases variety.

## Design

MERIVOBX is unique thanks to its distinctive drawer side design and unmistakable look. Create your own diverse range of cabinetry using MERIVOBX.

## Functionality

The innovative shape of the cabinet profile makes MERIVOBX incredibly stable - even when fully loaded. The high load capacity coupled with the feather-light glide makes accessing storage goods a breeze!

## Assembly

No matter which MERIVOBX option you choose, it can be assembled quickly and easily because of the consistent platform concept. What's more, the adjustments are clearly labeled and easily accessible.

**One drawer side – countless possibilities**

Drawer sides form the frame of the drawer. The integrated platform interface makes it easy to add a variety of components: MERIVOBX E Height with a gallery, with BOXCOVER or a closed metal side with BOXCAP. It is extremely easy to create differentiation for your customers.

**One front for all**

The same drilling position and front fixing bracket for your entire MERIVOBX range. One front for all drawer options and one for all high fronted interior roll-out options. This presents a compelling argument for faster assembly.

# Simplify Your Processes With a Diverse Platform

Our completely new MERIVOBX box system gives you simple manufacturing *and* great variety, making it easier for you to meet the needs of your customers.

## Cabinet Profile as the Basis of the Platform

You can use the same fixing position (height and depth) for all applications – be it with BLUMOTION or SERVO-DRIVE, with side stabilizers or for inner drawers. Simply drill into the cabinet in the same way every time and then decide which solution you wish to install.

### Smooth Transitions

Smooth transitions are a key feature of the well-thought-out design – for virtually seamless drawers.

### Exposed Metal Parts

Metal components and a coordinated color scheme create a top quality look without any nylon components – even for the version with a gallery.

### Distinctive Drawer Side Design

The slim drawer side has a distinctive design line that creates exciting light reflections.

### Branding Element

Add your own branding to the drawer side – simply slide on the branding element for consistent positioning. Or not. Drawer sides have a sleek look even without a branding element.

### Flush Cover Cap

The clear-cut design on the inside is rounded off by a flush cover cap. AMBIA-LINE beautifully organizes interiors even with cover caps in place.

### Straight on the Inside

This enables you to use storage space right up to the edge. Combine with AMBIA-LINE to create stunning interiors and maximize the storage available.

# Opt for a Unique Design

### Drawer Stop

The integrated drawer stop guarantees that the cabinet profile and drawer are connected securely. Accidental removal is impossible.

### High Front Stability

The front attachment is extremely stable for both drawers and those with high fronts for interior roll-out applications. No additional stabilizer is needed even when implementing high cabinet fronts.

### Vertical Stability and Full Load-Bearing Capacity

The box system is exceptionally stable thanks to the unique L-shape of the cabinet profile. What is more, it has a high dynamic carrying capacity of 125 lb or 170 lb ANSI load ratings.

### Stable Front Position

No matter whether empty or fully laden. Once adjusted, the gap layout will remain aligned to create a harmonious look.

**Synchronized Feather-Light Glide**

The new box system is characterized by a silky-smooth glide when opening and closing.

# Benefit From Impressive Functionality

Use our EASY ASSEMBLY app to find answers to any questions you may have about assembly and adjustment. [www.blum.com/eaapp](http://www.blum.com/eaapp)

### **Tilt Adjustment**

You can adjust the front connector plate in just a few simple steps – no matter which drawer side height you use.

### **Fast, Reliable Assembly and Removal of Fronts**

You can easily insert the front thanks to the holding position, even when a drawer is already in place. Very wide fronts can also be easily removed, even by a single person.

# Improve Your Efficiency With Well-thought-out Assembly

Every MERIVOBX option can be implemented quickly and easily thanks to the consistent platform concept. The box system has simple, clearly labeled and easily accessible 3-dimensional adjustment options for side, height and tilt adjustment, which are the same for every drawer side.

### M Height

Drawer side M Height is a true workhorse – as a drawer, but also as a base for all high fronted drawer options.

Hardware selection made easy with the online Product Configurator at [www.blum.com/configurator](http://www.blum.com/configurator)

# The Easy Way to Offer Variety

MERIVOBX is based on a platform concept so you can create a broad range of drawers and interior roll-outs with just a few components – and all with the same easy assembly process. This simplifies production processes and increases efficiency.

**E Height with Single Gallery**

Create a clean-cut design with the use of exposed metal components.

**E Height with BOXCOVER**

Create unique drawers – with large design elements.

**E Height with BOXCAP**

Simply clip on BOXCAP and you have a metal drawer with closed sides.

a sleek impression.

# MERIVOBX in the Kitchen

Its impressive functions make MERIVOBX ideal for the kitchen. Regardless of what's cooking, our latest box system ensures that kitchen users have clear visibility and ergonomic access to all storage items. Choose the right model to suit the application and your preferences. MERIVOBX is a reliable partner – and not just for cooking. For the lifetime of the cabinet.

**MERIVOBX E Height with Single Gallery**  
The high fronted drawer option with a gallery is a real eye-catcher and a top quality solution.

**MERIVOBX E Height with BOXCAP**  
Experts consistently opt for metal: it accentuates the clear-cut design.

# MERIVOBX Throughout the Home

A box system that proves its worth in the kitchen is also ideally suited to other living areas. The top quality look of MERIVOBX blends seamlessly into any home.

## In the Study

Equip your home office with MERIVOBX and make working from home a cinch. Pens, pads and folders are exactly where they should be and immediately within reach.

### **In the Living Room**

Bring variety to drawers: combine MERIVOBX with BOXCOVER to highlight your personal style in the living room. Use design elements to create daring contrasts and amazing harmonies.

# In the Bathroom

SPACE STEP

SPACE TOWER  
MERIVOBX E height with  
gallery as inner drawer

Regardless of the application, MERIVOBX looks just as good in the bathroom. Be it in the form of the SPACE TOWER, SPACE STEP or a conventional vanity, maximize the existing space and make day-to-day life easier. A stunning design enables you to meet customer requirements – no matter which version you opt for.

# In the Bedroom

Either as a bedside cabinet or vanity unit, MERIVOBX is practical for day-to-day use – and a plus for real bookworms and little beauty queens alike.

# In the Closet

Find the right spot for every item of clothing while maintaining full visibility. Be it for a weekend trip or the next holiday, your suitcase will be packed in no time.

MERIVOX operates easily even when fully loaded. Solutions like the SPACE TOWER unit create valuable storage space by allowing each drawer to be opened individually, offering full visibility and easy access to storage goods.

# Cabinet Solutions

Cabinets and hardware have to withstand the rigors of everyday use. Blum has been observing the requirements of users for years. Thanks to our research, we are constantly coming up with new ideas for making modern living environments even more functional.

## SPACE TWIN

Diagonally offset cabinet profiles allow you to turn tiny gaps into valuable storage space.

## SPACE STEP

The clever toe kick solution creates additional storage space and gives users easy access to higher storage levels.

# 100,000

## Opening and Closing Cycles

Blum hardware is designed to impress you on a daily basis with its functionality and durability. MERIVOBX has been put through as many as 100,000 opening and closing cycles. As a result, our drawers are a pleasure to use for the lifetime of the cabinet.

# Motion Technologies for MERIVOBX

## BLUMOTION

by Blum

### Standard with Soft Close

Soft and effortless closing for all your cabinets – no matter how heavy the drawer, door or wall cabinet front.

## SERVO-DRIVE

by Blum

### Electrical Opening and Soft Close

MERIVOBX drawers can open with a single touch. They close again softly and effortlessly thanks to the integrated BLUMOTION soft-close mechanism.

### Marketing

You will find professional photos, videos, brochures and presentations on MERIVOBX in the Marketing Media Library. Get some fresh inspiration and use our marketing material to inspire your customers in sales conversations.

### Concept, Planning, Quotation

Plan, configure and save your MERIVOBX projects online with ease with our free Product Configurator. This enables you to obtain checked and complete parts lists for your customer quotes.

### Ordering

Simply download your parts lists from the Product Configurator and send to your distributor. In order to speed up your MERIVOBX configurations, you can manage your different projects and templates with ease under "My projects" and "My library."

# Supporting You Every Step of the Way

We at Blum will support you along the entire process chain – from marketing, planning and product selection right through to after sales service. Take advantage of our user-friendly services for your projects with MERIVOBX.

### Manufacturing

Use our Product Configurator and appropriate assembly devices to accelerate your production process. Simply use BXF files and EASYSTICK to transfer your planning results to MINIPRESS.

### Assembly

Precise installation and adjustment are important to you. Our EASY ASSEMBLY app for smartphones and tablets answers any questions you may have about the assembly and adjustment of our hardware. It contains installation instructions and videos for all our products.

### After Sales Service

We are delighted to provide you with continued support after you purchase MERIVOBX. Your personal contact at Blum will be happy to answer any questions you might have about our products and services.

## Quality of living

We engineer our products with your lifetime in mind. As your mobility needs change, Blum hardware keeps your cabinets accessible.

## Product range

Everything from a single source: Our wide range of products allows you to keep up with the trends of today and tomorrow.

## Inspiration

We monitor global trends and strive to create the solutions of tomorrow. We like to share our insights with you.

## Innovation

We stay in motion. Our curiosity and pioneering spirit drive us to develop new products and services for you.

## Services

We support your daily operations with customized services tailored to your processes.

## Quality

We continuously strive to improve our products, services and ourselves.

## Trust

It's our goal to build lasting relationships with our customers, employees and in our community.

Julius Blum started our journey in 1952 with horseshoe studs. Today we supply innovative hardware to customers in over 120 countries.
